

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1-27. (canceled)

28. (currently amended) A collapsible bar comprising support members and means for releasably latching work surface elements to the support members, wherein there is a selectable number of the support members, the number of support members being variable from two to any number, wherein a plurality of selectable and interchangeable work surface elements having different functions are provided, each selected said work surface element being removably engagable with the support members via the releasable latching means, so that, when assembled, the said selected work surface elements interconnect the support members, and wherein at least one of the work surface elements includes one of a recess and an aperture through the work surface element, the said recess being suitable for use as at least one of a multi-bottle holder and an ice-chest, and the aperture being suitable for at least one of receiving and supporting a waste container therein and receiving a waste chute leading to a waste container,

wherein a said surface element is removably positionable in a plurality of positions on the support members and is interchangeable with another surface element.

29-35. (canceled)

36. (currently amended) A collapsible bar as claimed in claim ~~35~~ 39, wherein the screen wall is hingeably jointed to enable folding.

37. (currently amended) A collapsible bar as claimed in claim ~~35~~ 39, wherein the screen wall is freestanding.

38. (new) A collapsible bar comprising support members and means for releasably latching work surface elements to the support members, wherein there is a selectable number of the support members, the number of support members being variable from two to any number, wherein a plurality of selectable and interchangeable work surface elements having different functions are provided, each selected said work surface element being removably engagable with the support members via the releasable latching means, so that, when assembled, the said selected work surface elements interconnect the support members, and wherein at least one of the work surface elements includes one of a recess and an aperture through the work surface element, the said recess

being suitable for use as at least one of a multi-bottle holder and an ice-chest, and the aperture being suitable for at least one of receiving and supporting a waste container therein and receiving a waste chute leading to a waste container,

further comprising a bar-top element, which is supportable by the first and second support members, and means for releasably retaining the bar-top element on the first and second support members.

39. (new) A collapsible bar comprising support members and means for releasably latching work surface elements to the support members, wherein there is a selectable number of the support members, the number of support members being variable from two to any number, wherein a plurality of selectable and interchangeable work surface elements having different functions are provided, each selected said work surface element being removably engagable with the support members via the releasable latching means, so that, when assembled, the said selected work surface elements interconnect the support members, and wherein at least one of the work surface elements includes one of a recess and an aperture through the work surface element, the said recess being suitable for use as at least one of a multi-bottle holder and an ice-chest, and the aperture being suitable for at least one of receiving and supporting a waste container therein and receiving a waste chute leading to a waste container,

further comprising a screen wall for screening the front and sides of the in use bar from patrons.
